substitute therefor the enclosed New Abstract.

NEW ABSTRACT

A scanning display apparatus includes a display operable to receive driver signals and generate corresponding visual information for presentation on the display, to sense radiation received at the display and generate corresponding sensing signals corresponding to a region proximate to the display. The apparatus also includes computer hardware coupled to the display for generating driver signals for the display and for receiving the sensing signals from the display. The computer hardware is operable to provide an interactive user interface at the display.
